

Part 4

Natural Scientific Societies in Home Universities

Natural Scientific correlation
((((((((((O))))))))))((((((((O))))))))

**Natural scientific Empirical reality
Related to
the human intellectual and social
development**

Five different empirical realities

- 1. Man made” empirical realities Present existing societies with man made intellectual and physical means**
- 2. Development dynamic or actual empirical reality which changes man made intellectual and social changes towards, natural scientific societies.**
- 3. Relative Natural scientific realities or what human being understands from creation. Because of human intellectual relativity, these views are
“ relative “ natural scientific realities**
- 4. “Actual” natural scientific reality. Which is a copy of**
- 5. Main Non physical empirical reality**

Or

**the Main Essence and property=
MEP = Creator**

((((((((((O))))))))))((((((O))))))

**Natural Scientific
Essence (WVLMSFTA etc.
constructional dimensions
as (software) and
Functional Property
(application) Societies
In which
co – relation with own body,
other people and
Other natural beings are
Natural Scientific**

(((((O))))))(((O))))))

**Intellectual Relativity
of everybody and the whole humanity together and
based on this relativity, every view is relative and
thereby can be up to 100 % wrong. Views mentioned
in this book is not any exception namely
Can be up to 100 % wrong.**

MEP in this study

MEP = Main Essence and Property = Creator

For making the MEP easier for understanding, study begins with human innovations in which

A. Essence

Every human innovation, has different constructional non physical intellectual dimensions. Among others (WVLMSFTA) etc. or will, value law, mathematics, structure, function, technology, aim etc. by which innovated thing is constructed and

B. Properties

or intellectual application thoughts by which different innovated things have their different functions.

C. Innovator's Essence and properties

These Essence and property by which ,
Innovated things are innovated and have different
functions , are not
intellectual essence and properties, in innovator's brain
Which are **the main essence and properties**,
They are a copy of the innovator's thoughts in
essence and properties of – innovated things.

Because after innovation, essence and properties in the
brain of the innovator, has not disappeared, they remain
in the brain of the innovator as the **main form**.

D. Creation's Essence and properties in which

/ Every natural being has its, her, his own
intellectual

Constructional thoughts as **Essence** and

Functional thoughts as **properties**.

These natural beings essences and properties

are a copy of the MEP who is

the Main Essence and property.

There are endless essences and properties in the universe but , related to the Main essence and property, they have been mentioned in singular form because there is only one MEP in the whole endless universe

((((((((O)))))))(((((((((O)))))))))

Starting point

Choosing

Natural scientific way of research and living

In the same way that,

the MEP or the Main Essence and Property, or
/ Main WVLMSFTA etc. of the universe and

/ Main TAVDA etc. **affects**

in natural creatures

and makes aimed changes,

without any need to human help of

without any man made means. again

In the same way,

can human being, make changes

in her and his

/ **intellectual body** (sum of every personality's

WVLMSFTA etc. thoughts and
/ **physical body and**
/ do changes in other people and
/ other creatures

Outside her and his body,
Again in the same way which happens
In everyday life,
in human body and the whole universe,
both in **micro** and **macro** levels

.....

Practicability of the view

is

Existing and functioning universe
Which is created and functions
Without any human help and
Without any man made means

.....

(here aim of two withouts is not

Without human engagement, It is rather,

Human interference, in

“ natural scientific function of the natural beings by

/ man made (WVLMSFTA etc.) will,

value, law, mathematics

structure, function, technology, aim etc.)and

/ man made means among others like

- Double - slit experiment, in quantum mechanics
- CERN activities,
- researches in hospitals with man made intellectual and physical means.

Otherwise, Every human being should take part in Searches and studies for her and his general natural scientific development.

.....

Thereby

So long studies are not without any human innovated intellectual and physical means they are not creation aimed natural scientific studies, Like CERN particle accelerator, activities, or bubble slit experiment in quantum mechanics or studies in hospitals with man made means etc.)

Empirical realities made by man made means **are not natural scientific realities** thereby their studies are not natural scientific studies **they are man made studies with man made intellectual and physical innovations.**

.....

Falsification

of the view

Falsifying the view by proving that

Without human intellectual help or physical innovated means , the universe could not exists and function..

This prove **absolutely is not possible** because the universe and body of human being , has been existed , Before she or he becomes aware of her or his existence In this universe.

Three evaluation points

Unimaginability

Living behind present man made societies and

Thinking, talking, looking, acting, living Natural scientifically, without any man made intellectual and physical WVLMSFTA etc. is unimaginable but

Undeniability

This is undeniable that man made intellectual and

Physical WVLMSFTA etc. are not natural scientific and **result of this un – natural scientifically** is all human intellectual, physical, social, environmental etc. diseases and problems.

The only way

Based on undeniability , the only way is

Going way of

the main natural scientific WVLSMFTA etc.
and property ..

Chapter Five

A. Home universities

In

Creation university

Every natural creature is

/ a natural scientific book with

/ its, her, his WVLSMFTA etc. as its content,

/ materialized in physical body of the creature.

Thereby

Libraries

In every point of the universe

/ there are different creatures as

/ different books in it

Which makes the place as a library or home
library for those who living there.

Laboratories

These libraries, are at the same time for

Research on

a.. **Thought- ization of matter** or

Converting physical body

To non physical WVLSMFTA etc. and properties

b.. **Materialization of the thought** or

Converting non physical

thoughts

To the physical body like all

Human innovation thoughts

In innovated means

And all human activities as

Result of the non physical “ thoughts”

behind them

A. Physical Home Universities related to

MFPS

**“ Matter Feeling Property” Societies or
Human Societies with using “ MFP”**

Or

Post-Democratic **Physical** Natural Scientific
Essence (software) and Property(application) Societies.

Without man made intellectual and physical means

With the human physical body and the physical
universe by

Using MFP or Matter Feeling Property

An replacing example for Chapter five

Natural scientific societies, **without** any man made intellectual and physical innovation means,
Which will be replaced by
natural scientific **discovered** means,
for example, present existing man made internet, will be replaced by,
ca. 8 000 000 000 People non physical " mind " as
Natural scientific internet,
in which,
everybody's " mind " is her or his " website in this internet.

Societies and home universities

Home university - zation of the cities, By leaving the cities and establishing, Natural home universities,

For not being dependent to others in natural needs,

Among them,

/ **Job**, in which everybody is a natural scientific researcher with two main results,

- 1.. universally, everybody is universal researcher and
2. universally nobody is dependent to others for a job.

/ Nutrition articles,

in which everybody is NS researcher, with two main results

1. Universally everybody becomes natural scientifically nutrition expert with lesser and lesser

Diseases and illness and

2.. Universally everybody becomes independent

to other in nutrition articles .

/ dependence which is hunger

/ hunger which is abused in all human history.

Again

Universally producing nutrition articles, leads to

Universally becoming independent in access

to food and avoiding hunger and dependence

to others for food.

in researching and producing them,

Ultimately, not being dependent to any other people

For nutrition articles.

/ Medicine,

in which everybody, is life long researcher

On her and his bodies with two main results,

- 1.. universally becoming Medicine doctor and
2. not being dependent in other people as doctor etc.

/ other eras

One important point here is this point that

Universally independent does not mean,

universally separation of people from each others

it is rather

universal independence in universal oneness..

this universal oneness is in three different levels

1.. individual oneness in which

Everybody's intellectual WVLMSFTA etc.

Becomes like her or his body's WVLMSFTA etc.

Which is an universal oneness

In thinking of everybody with her and his body's

Natural scientific function.

2.. universal oneness with other people

In which

Universal oneness of every individual

Becomes unified with

Universal oneness of

the whole humanity together..

3.. universal oneness with other creatures

Oneness of every individual,

With animals, birds and inorganic beings.

And their function according to the creation's natural scientific WVLMSFTA etc. which leads to

Oneness in function of everybody with

Other creature's WVLMSFTA etc.

Like an human body in which

Endless atoms, cells, organs,

/ Despite their individual functions

/ all of the are an unified human body and

Function in oneness.

Again based on this point that human body and nature are NS beings,

A. Human properties should be used in NS way like

/ thinking, talking, looking, deciding, acting should be as a natural scientist,

B.. Avoiding covid – 19 and all other man made

problems,

by establishing natural scientific societies with NS home university in which everybody from time of being a child to time of leaving, physical body

(for starting, non physical essence and property life)

is a natural scientist.

C. by Home university - zation,

1. Everybody has not only a natural scientific job, even NS life .thereby is not depended to the cities for man made jobs in

A. stores

B. Banks,

C. State employee

D. Military

E. Man made Technology

F. Every man made job

G. etc. etc. etc.

2. Everybody has needed nutrition articles

by NS searching, production and NS using them, thereby, nobody is dependent on cities for nutrition articles and thereby, never will be hunger because of not having food articles.

3. Everybody research on her and his body and

thereby is not dependent to hospitals of cities etc.

In these home universities

By NS (TALTDA) thinking, awareness, looking, talking, deciding, acting and generally living everybody will avoid almost all kinds of diseases including co vid 19 and thereby, any need to hospitals.

The aim is, among others

Home university- zation of the cities, by leaving the cities and establishing, Natural home universities,

In which, human body ,nutrition articles and every natural being is a research means

For developing towards the relative all knowerness and not being dependent to others in natural needs.

5.1 The human body and the whole universe

The human body, nature and the universe are natural scientific beings, and the man-made things are not. This irrelevance, among others, has caused the following general damages

1. By not thinking, talking and not living the natural scientific way, the human loses, among others, the sciences on
 - / knowing his or her own body,
 - / knowing about nutrition
 - / and knowing about the environment
in a natural scientific way,
2. As a result of the mentioned irrelevances, Humanity suffers of, among others, so many Intellectual, physical, social and environmental diseases and problems.

5.2 Time's Logic and its Development

One of the dimensions of time is its division into :
past – present - future

In this Logic

Always the present is the future of the past
And the future is the coming present this means that,
**The present societies are
Neither past Nor future societies.**

This development will continue until the human enters

First

Into the post-democratic natural scientific societies
Without any man made intellectual or physical
Innovation and there after

Second

Will humanity enter to the
Post NS Physical societies namely
/ not only without any man made
/ even without “ natural physical bodies
Like human and universe bodies.

In other words

**Non physical essence and property
Of human body's and universe body's –
societies**

**in which
there will not be any matter-related time.**

5.3 Five different empirical realities

As it has been mentioned, **Because the “existing societies’** (WVLMSFTA etc.) are man-made and not natural scientific, with the existing intellectual, physical, social and environmental diseases, damages, problems etc., the development dynamic as the “ actual reality” **Is changing** and will change man-made societies **Towards** the “ post man-made “ societies Namely the natural scientific societies, in which there will not be any man-made intellectual or physical means,

First there will be, **the physical** natural scientific society and

Secondly there will be the non-physical essence and property societies.

5.4 Home universities

The MEP as MER or Main Empirical Reality .

the Non-Physical Main Essence and Property_of the universe

have constructed and given function to every natural creature and the whole universe.

**The whole universe is the University of the MEP
With every point in it as a home university for the
human being in which
every natural creature is**

/ a natural scientific **book** with
/ its, her, his WVLMSFTA as the content of the book
/ materialized in the body of the creatures. Thereby,
in the **Libraries**, in every point of the universe,
/ there are different creatures as
/ different books in it, which makes
/ every place as a library like a home library.

Laboratories, they are converting Research by the
thought-ization of the physical creatures for finding their
NS essence or WVLMSFTA etc. These activities make
every place or the home a research center or laboratory.

Thinking, talking, activity, living are all
/ based on the essence (WVLMSFTA etc.) or
constitution of every creature, in other words
societies without any man-made intellectual
or physical WVLMSFTA etc.

5.5 Daily life, without any man-made means

5.5.1 There are three different co - relations study and Activities

in the home universities

- A. the correlation of every personality with his or her own body.
- B. the correlation of every personality with other people and **with** the thinking brain having creatures.
- C. the correlation of every personality with other creatures **without** a thinking brain in the universe.

A. Properties Related to his or her own body

Every individual's Personality has a process between, thinking and acting. this process in / his or her own level, can be used in / other people and in / other natural creatures.

His or her own level

if **some Personality**, for example will talk about something,

1. by using non material " thinking " property thinks to do something, ex. talking.
2. by Using non material decision making, property makes a decision ex. talking . by
3. Using non material " affecting property, for
4. affects in non material talking property or application of the brain and
5. Affects in physical organ of talking and there after
6. non physical personality , talks physically .

Thereby, **physical act of talking is**

result of 5 non - physical acts.

B. In connection to other people and the thinking brain-having creatures.

In this connection with other people, after the first 4 different non-physical acts, **instead of** affecting his or her own brain and body for doing something, the **Personality comes into the non physical universe of personalities, with**
/ non physical essence,
/ non physical properties,
/ non physical Minds etc.

instead of talking physically by the tongue and mouth, the Personality talks **intellectually or non- physically**, by the **non-physical " talking property "**.

thereby talking becomes intellectually.

C. In connection to other creatures without a thinking brain in the universe.

In this case the creatures without a thinking brain and thinking property, every non-physical Personality, can after the first 4 steps, in her or his brain

1. The non physical personality
2. can intellectually affect
3. in the" non-physical " essence " of the related creatures
4. by the " affecting property" and

5. do the desired changes.

Practicability

This “intellectually “affecting and making different “Physical” changes is behind all physical activities of the universe, including human birth. Because the universe and human (before her or his “awareness property starts its function) are not aware about their own existence) but again the universe is active. **Thereby,**

In the same way,

1. Everybody, not only has capability of, intellectually, make both physical and intellectual changes in her or his body

In the same way

2. Can both intellectually and physically affect in other people and
3. Can both intellectually and affect in other creatures.

Human non physical life has its own NS **regulations for security** without any place for un security or anarchy.

For ex. in the same way that in present time

Despite existence of around 8 000 000 000 human non physical “minds “or biological USB, there is not any Mind anarchy. Every “mind” works for her or his own personality. **It is the same** in the human “non physical life” with NS security, NS human right and without any

place for anarchy.

Capability of the non physical personality

in the same way that

everybody's non physical personality, has the capability of affecting in her or his body for both physical and intellectual changes,

in the same way

every body can affect both physically and non physically in both
/ other peoples and
/ other creatures for the aimed changes.

Human has the capability of these activities.

This non physical life is developed more among others in chapter 6.

Home universities at present time

- / Different on line studies**
- / Different distance studies,**
- / Distance demonstrations,**
- / Different global networks** like, google yahoo etc.

And possibility of those who are connected to internet in seeking answer for their questions are first steps and beginning for global home universities.

Next important point is,
Giving earth to people as home university, **spreading out cities and universities to every home by universalization of the access to studies.**

At present time, in this stage,
this university- zation is physical but
in the next stage will change to the non physical
home university – zation by among others “ mind
internet” etc.

5.6. Medical treatments of he Physical Body

Hospitals as an example

In the same way that,

Different organs of every patient and surgeons,
themselves are created
/ without surgeons and
/ without all human innovated surgery means

In the same way

Can all diseases be treated without
Any man made means.

The first point to do is,

To Replace, man made innovation way of studies and activities with NS discovery solution way of studies and activities. At the same time, Intellectual and physical innovations, can be used as a bridge between

Present time, societies and future's NS societies

Without them..

Every natural creature is a written book, by finding its Alphabet, that creature can be read like a man-made book. Every creature is constructed and functions according to its, her or his essence or WVLMSFTA etc. By learning the essence of the creature, changes can be made. For example, in the case of the human brain, based on the brain's WVLMSFTA etc. everybody can even treat her or his own brain without any need for man-made means, for example Laser Technology etc. .

The treating process,

- /the **non-material** Personality
- / by using different properties and
- / for going (being, because the Personality is not

physical, by willing to be somewhere immediately, the Personality is there) inside the aimed cell or part etc. and / knowing the essence or WVLMSFTA etc. of the related subject, and/ by controlling the construction of the **non-physical** essence of the aimed point or seeking after and

Thereafter the Personality,

/ can find the **physical** damaged point in the structural construction **in** the form of

/ lacking something or

/ something being in excess or

/ being damaged etc.

thereafter the Personality

/ can affect the physical part and **compensate for the** lacking or excess in the body , by using his or her “ affecting property power “ as a surgery means.

Comparing between man-made and NS surgery.

Man-made laser surgery,

1. The surgeon with his or her physical body uses man-made means

and makes the desired changes in the aimed point

2. The natural scientific surgeon, by his or her “ own Personality, “ the non-physical Personality by using his or her own non-physical “ affecting property “ makes the desired change by his or her affecting property. Without any need of the man-made laser or other technologies.

Observation

This proof for this “**thought surgery** “ by the affecting property, among endless others, is the human activities in which every act of everybody

is the result of her or his “ thought “ about something,
for example, talking, going, working etc. in which
the non-physical Personality of every individual,
by
using the non-physical “ affecting property “ affects in
the physical body and does the desired physical act.

In this way ,

Everybody can treat even herself or himself
even by doing surgery on his or her own brain.

5.7 De - naturalization

**Without any doubt at present level of
human way of living, not only, many man made
means are necessary , even without them would
patients suffer to much.**

But what is important here,

Changing thinking life to the NS life, by

1. Making homes, as home universities and among others
2. Avoiding different diseases and damages etc.

The worst dimension of this denaturalization is this point that by the activities based on man-made WVLMSFTA ... the human does not follow the natural scientific thinking and activities and thereby, Looses NS learning in the related creatures and subjects. For example, in the case of internet,

**by not following,
the NS Humanity Internet Network
he and she loses communication**

with more that almost 8000 000 000 people
in a global network, in which,
every person's " mind" is as her or his website in this
" NS Humanity Internet Network. "

Other non-physical essence internets are,

the Atom Essence internet,
the Cell Essence internet,
the Brain Essence internet,
the Plant biological essence internet,
the Insect biological essence internet,
the Birds' biological essence internet,
the Animal biological essence internet,
the Human biological essence internet,
All known and unknown universes' essence internet.

By using these internets,
Not only people can have communication,
Even everybody can have a connection with
Every existing natural creature in the universe,
Not only an internet connection,
even **by using the non-physical Personality outside the
body, everybody can be everywhere,**

From yet not discovered, pre quark beings,

To inside the atom, cell, sun, planets, etc.
Because the Personality is not a physical being, she or he
can be everywhere in the universe, without any need
for flying or walking.

5.8 Re- naturalization

**Re- naturalization is for all dimensions of man-made
WVLSMFTA etc.**

Among others, replacing dependence by
de-concentration in cities and other power centres,
With **replacing** cities
with **Home Universities by home university – zation**
of the cities
by making cities smaller and smaller and by **giving**
access to everybody for a NS life in natural libraries and
laboratories which means
less power concentration and more independence for
everybody by

**Universalization of access to
Creation books and laboratories.**

Very easy and touchable, both physically and
intellectually, examples in this case are hospitals and
their "**Re – Naturalization**" activities, for
treatment of diseases, created by the

denaturalized way of peoples' thinking, eating, living etc.

All the time, researchers try

- A. To understand** the " NS " functional way of the body and organs
- B. To Find** " the De – naturalized" activities as the cause of diseases and ultimately,
- C. By leaving** behind point B. and re- activating the NS function of the related organs by the needed medicines etc.

In this way,

by leaving behind the **denaturalized** causes **in the body** and by the re naturalization of the activities, first of all people develop intellectually in the related subjects, such as by becoming a physicist, chemist, biologist etc.

This **Home University - zation** and power **de concentration,**

By making the size of cities smaller and smaller and
By universalization of access to
all of the Creation books and laboratories.

At the same time,

This universalization of power is based in the universal unity and oneness.

Like in the human body, despite the individual function of billions of cells, all of them together are one body.

The present modern societies are concentrated in cities in which People are dependent on the cities, among others,

**For food,
For jobs,**

**For hospitals,
For universities etc. .**

**How can this dependence be taken away ?
For example, in the case of food, the universalization
of nutrition studies both happen**

a. in the production of the food articles and
b for studying them, and this leads to, among others,
the independence in the access of food articles and
as a nutrition researcher and expert, this leads to
Knowing the food articles, eating, drinking right etc.
which leads to a healthy life and having no need for
hospitals etc.

Summary : chapter five

Chapter five is about Natural scientific societies, **without** any man made intellectual and physical innovation means,

but with replaced natural scientific **discovered** means, for example, present existing man made internet, will be replaces by,

ca. 8 000 000 000 People non physical " mind " as
Natural scientific internet,
in which, everybody's " mind " is her or his " website in
this internet.

Observation,

The aim of this study for replacement of the man-made
things with natural ones,
is not leaving behind all man-made innovations and
living without them.

The aim is,

Meanwhile man-made innovations are used,
the orientation should be like a natural scientist which
should be discovering the needed natural way or means
of problem solving.

-

Based on these points

1. The human body and nature are NS beings but man-made things are not.
2. The present societies related to time,
past – present- future,
even man-made future societies are naturally
scientifically invalid.
3. The actual empirical reality, the development dynamic
changes man-made intellectual and physical innovations

and replaces them with new ones.

And example for this development is

Existing situation in 2020 related to the covid – 19 and damages made by human being because of wrong WVLMSFTA etc in which

Researchers (not all because many so called scientists are themselves cause of these Intellectual, physical, social diseases for human being and damages in nature .

This group of so called natural scientists

has made not only human body, society, earth, oceans, even the space as a garbage can) .

some researchers, try among others to understand causes of diseases and damages for avoiding them and behaving natural scientific which is among those steps from / man made WVLMSFTA etc. and living to / natural scientific WVLMSFTA etc. and living.

Three evaluation dimensions of the views

Unimaginability,

NS societies seem to be unimaginable, but at the same time,

Undeniable

It is undeniable that man-made things are not NS and thereby irrelevant to the natural universe. hereby

Present studies based on, only existing man made empirical reality are wrong because,

1. Is not based on the human body's and nature's Natural scientific empirical reality, and thereby,

Have a wrong basis,

2. Have not any goal specially NS goal, because They take only existing man made realities, Thereby

These studies

- a. Has not NS basis,
- b. Has not any NS goal and
- c. Is only a study without NS basis and goal.

The only way,

Because of the invalidity of the man-made intellectual and physical means, will humanity leave behind man-made societies and will enter into the post-democratic or Natural Scientific societies with every home as an home university.

Home universities

Re-naturalization

Of human WVLMSFTA etc. in thinking, talking, working , living etc. in the NS intellectual universe.

In home universities

everybody is a NS student from birth and childhood upwards to physical death and thereafter.

The thinking, talking, acting, living etc. (TTAL) of **every Personality in relation to his or her own body and other people and creatures, there will be existing concentrated researches in every house as the home universities.**

The practicability,

Again, not only in the future, even today,

The natural scientific researchers try
to know and understand the human body and nature and
implement them and
avoid mistakes and follow the natural scientific
WVLSMFTA etc.

Thereby,
the first steps for establishing NS societies are taken and
will continue.

Present studies based on, only existing man made
empirical reality are wrong because,

1. Is not based on the human body's and nature's
Natural scientific empirical reality, and thereby,
Have a wrong basis,
2. Has not any goal specially NS goal, because
They take only existing man made realities,
Thereby these studies
 - / Has not any NS basis,
 - / Has not any NS goal and
 - / it is only a study in related point /s.

About dying

Only physical creatures who or which need water, food, air for living, they will die but not the Individuality, Personality, properties etc. which have not any physical body and have not any need for air, water, food etc.

Non Physical living property and life after physical death

One of the best definitions for “ living property” is “ dead body “ in dead body, Physical body is existing but has not living function, thereby living property should be a “ non physical “ being, thereby, because of “ not being “ physical,

The Non physical personality, will continue, her and his non physical life in a **non physical** natural scientific society.

Chapter six

Non Physical Home Universities

**Without MFP Societies or
Without Matter Feeling Property, societies or
Post-Democratic**

Non-Physical Natural Scientific
Essence and Property Societies

Without both

Man made mean and

Without

human physical body, physical universe.

Non physical and physical parts in human body

- / physical “ brain,**
- / non physical “ Mind “**
- / non physical “ personality”**

Non physical life of

Everybody's " Mind " In which,
Neither mind

Nor its contents are physical,

Both of them are non physical.

1. Physical universe

related to the Mind : examples

/ Physical body of parents

/ Physical body of a Mobile

/ Physical body of an airplane

2. Human brain

A. Physical part of the Brain which

Can be seen, touched physically.

B. Brain's non physical properties or
applications

By which **physical impulses** reached to brain

Converts to non physical thoughts or concepts

For ex.

Impulse from parents, mobile, airplane etc.

converts to

Non physical concept of the parents,

Mobile, airplane etc. and

Saves in non physical Mind.
These **converted** non physical concepts
in the mind

Neither are physical brain
Nor physical parents, physical mobile,
Physical airplane etc.

Both mind itself and its contents are

Non physical thoughts or concepts etc.,

3. the Mind

Is like an
non physical, biological USB,
in which are all
non physical information collected.

4. Non physical – physical **togetherness**

One of very strange but very beautiful functions

In the universe is togetherness and cooperation of the

Matter and non matter ,

Like cooperation between

Non physical Mind and physical brain or

Mind with physical body and

Physical universe.

Small summary: Non matter – Matter

Mind and its contents, are

Neither

physical brain

Nor

physical beings like parents, mobile, airplane.

((((((((O)))))))(((((((((O)))))))))

Non physical life and activities

Before

Every physical act of the brain

if **some non physical Personality**, for example will talk about something,

1. by using non material “ thinking “ property thinks to do something, ex. talking.
2. by Using non material decision making, property makes a decision ex. talking . by
3. Using non material “ affecting property, for
4. affects in non material talking property or application of the brain and
5. Affects in physical organ of talking and there after
6. non physical personality , talks physically .

Thereby, **physical act of talking is**

result of 5 non - physical acts.

In other words,

Non physical life gives form and function

To the physical life.

This means that even today,

Every non physical personality has mainly a

Non physical active life

Two different universes :

- a. Physical parts belonging to the physical universe

Like physical brain, etc. and

- b. Non physical thought, like human mind and its contents belonging to the

Non physical universe.

in this way very easy can we touch

difference between non matter and matter .

Practicability

of the non physical mentioned views. Even today,
everybody’s personality has, a non physical life,
touchable

- a. in the sleeping time and
- b. in case of “ both together” or being awake but leaving
physical body

These cases happens “ **according to the creation laws**”
for personality.

One of the main tests for human life,

In the first step is,

finding how can personality herself or himself,

leave “ togetherness “

with physical body whenever is wished and

in the second step

Not using the matter feeling property,

When personality does not use “ MFP”,

There will not be, any human physical body and

There will not be any physical universe,

There will be

/ non physical (WVLSMFTA etc. and

/ non physical TAVDA & DCD properties

For a “ non physical life”.

Falsifying ,

Those who deny existence of a non physical life,
First of all they should prove that,
There is not any non physical personality,
Something which is impossible,
Because,
As it has been developed before,,
Physical body, even physical brain,
Not only is not any DCDer in its functions,
They are not even aware of their own existence.
thereby

/ If human being is aware about her and his existence,

It is by the non physical awareness property or
application and

/ DCD er for using the brain and the body

Is the non physical personality. Thereby,
Again falsifying existence of the non physical personality
Is impossible. In the case of those who do this unnatural
scientifically, they negate in the first hand
Existence of their own personality.

But even this negation is wrong because they have a
personality who administrate their Physical activities
(in using the body. Not natural scientific activities of the
body which are natural activities).

This

Impossibility of falsifying the existence of the
personality,

1. Falsify their own falsification view and
2. Verifies, what they falsify namely,
there is “ non physical personality.

Short Presentation of the Chapter

Chapter is about, human life, without, her and his physical body and without physical universe. based on their **non physical, essences** (WVLMSFTA etc.) or soft ware", by which human body and universe are constructed and **non physical** Properties or in computer language " applications", by which human body and universe have different functions.

It is about, Human life

- 1. Not only will be without man made means,**
- 2. the life will be**
Even without, human physical body and
3. Even without physical Universe ,
based on their **non-physical, essences** (WVLMSFTA etc.) or in the computer language "software"

(essence and soft ware are not exactly same points but as being non physical thoughts of the program writer by which innovations, and creation are constructed, innovated and created, are same point).

1. by which the human body and universe are constructed and

2. the non-physical Properties or in computer language " applications", by which the human body and universe have different functions.

The man-made innovations will be replaced by Natural Scientific discovered

1. physical means for physical life without man made means in chapter five and

2. non physical means for the non physical life Presented in chapter six.

for example, the present existing man-made internet **will be replaced by**

@ Mind internet @ of around 8 000 000 000 people " as a Natural Scientific Internet, in which, **everybody's " mind " is her or his " website " in it.**

In this way of living

1. Life of non physical personality, without man made means but with human physical body and physical universe, and

in the living way thereafter

3. Life of non physical Personality Not only life without man made means , even Without human physical body and even Without physical body of the universe.

4. **In the same way that,**
 in the **physical** life,
 activities are related to physical bodies,
- In the same way,**
 In the **non-physical** life,
1. the Activities of everybody
 2. Are by her or his Non-physical Personality,
 3. By using, the essence and property
 4. In connection with the essence and property of others
- Without any physical activity,**
5. But by
 / the non-physical Personality, there is not any
 physical body thereby,
 / there is not any physical movement
 / **she or he has immediate presence** everywhere,
 / **inside** the non-physical essence of every creature
from pre quarks, atom, cell, his or her own brain,
to the sun, space etc.
1. **for “ intellectual “ activities.** by using,
 2. among others, the non-physical properties.
- thereby,** humanity will generally **start**
 a NS non-physical intellectual essence and property life
 in the post-democratic natural scientific societies.

The Practicability of these views
 As it has been developed, in the

Personality's three different lives,
Even today, in two of them,
/ in sleeping time and
/ in being awake time, by leaving the physical body,
Everybody has these two lives,
What is lacking is,
the concentration in Personality and non-physical life,
By which the human can find
How in these two cases,
the Personality leaves the physical body and
Thereafter,
Every Personality can whenever they want ,leave the
physical body,
Not only just in these two cases.

Again the cause that the Personality,
Has not oneness in the case of physical and non-physical
lives is because of the Present human has concentrated in
the physical life, and almost absolutely, has not any
activities for understanding and having a Non-physical
life,

An example,

There are many different professors in different subjects
But they can't speak Persian or Swedish.

When an Persian or Swede talk in Persian or Swedish,
those professors don't understand what the Iranian or
Swede are saying. Here being a professor and not
understanding those languages does not mean being two
different Personalities. Again, the professor is active in
the related subjects, therefore he knows about those
subjects,

But the same professor has not been active in learning
Persian or Swedish, therefore, in the speaking time, she

or he can't talk Persian or Swedish.

The Personality of the professor, both in relation to the professor's subject and language is the same.

In the case of Personality, related to the non-physical life, it is the same, the Personality of people, related to their physical life is the same with the Personalities of the same people in their non-physical life.

In the first case,

1. the Personality **in the awake physical life**, because of being engaged with and having information and in different levels knows, what she or he does, but

in the second case

2. same personality in the physically **sleeping time** has almost totally another **non physical** activities

Bridging, making a bridge between first two lives
Biologically, personality is not “decider in process of sleeping or being awake. In the case of sleeping, Personality only decides for sleeping but does not play any role in going over to sleeping. In the case of becoming awake, personality has not any role in becoming awake. From physical process of the body in these two cases we should find Non physical laws of sleeping and becoming awake and ultimately

Making a bridge between them for
Personality's consciously biological sleeping and
Consciously biological becoming awake.

6.1 Time's Logic and its development

One of the dimensions of time is its division into :

past – present - future

In this Logic

Always the present is the future of the past

And the future is the coming present this means that,

The present societies are

Neither past Nor future societies.

This development will continue until the human enters

First

Without any man made intellectual or physical

Innovation and there after

Second

Will humanity enter to the

Post NS Physical societies namely

/ not only without any man made

/ even without “ natural physical bodies

Like human and universe bodies.

In other words

Non physical essence and property

Of human body’s and universe body’s –

societies

in which

there will not be any matter-related time.

6.2 Nature’s natural scientific empirical reality

As it has been developed, the present man-made empirical reality is changing and will be changed,

by the Development Dynamic as
the “ **actual** “ **empirical reality**.

In the same way that,

Researchers try to know more and more about the
human body and nature and follow them for
avoiding all bad lifestyle related diseases and
problems,

In the same way,

This development will be

1. Among all subjects and
2. All people and it will be universal.

In this level humanity will enter into

the post-democratic natural scientific societies
without any man-made intellectual or physical means.
This **physical** natural scientific empirical reality is
a **materialized** copy of the **non-physical** MER or
the Main Empirical Reality (MER)

This MER reality

/ is created by the MEP,
/ is a copy of the MEP’s thoughts for
/ making thoughts more touchable for the human

in

/ the creation university and
/ the home universities, For
/ developing universally the human
towards “ Relative All Knowerness”.

Property

the practicability of this view is existing in the functioning universe) Thereby

Without Essence and Application, there will not be any constructed and functioning creature. And

Without the Togetherness law ,

Different parts of the creatures couldn't be together

For example, if we take water,

2 hydrogen + 1 Oxygen = water

It is the Togetherness **Law** which keeps the 2 hydrogen and 1 oxygen together, thereby creating water.

Without this Togetherness Law,

There would be

H-----H -----O

Hydrogen and Oxygen couldn't be together and

As result , there would not be any water.

It is the same with the whole universe in which,

The Togetherness Law keeps things together,

The physical universe with
the Non-physical part results in

the existing and functioning universe.

6.4 Where are these converted

a. software and applications in the case of innovation and

b. essence and properties in the case of natural creatures ?

They are by togetherness law

with the innovated means, in the case of innovation and with the creature in the case of creation.

Again **without this Togetherness Law,**

there will not be

any constructed and functioning innovation in the case of the man-made things and

there will not be

any constructed and functioning creature

in the case of the natural creatures.

As a result ,

the two distinguished points

/ Soft wares and applications of innovations

/ Essence and properties of the natural creatures

1. Despite this, they are non-physical and have not any physical place,

2. These non-physical things don't mix with each other,

There is not any anarchy,

(because in the creation there is no random, no anarchy,) the MEP as DCDer of the universe is

an Absolute Intellect with absolute accuracy and absolute exactness.

The practicability

of this view is, again

/ existing and

/ functioning But

/ unaware (of its existence) universe.

6.5 The Non Physical Natural Scientific Life

In the existing human physical life

The **Personality** of every individual uses the physical body and non-physical properties and has a “**physical**” life **together with them**.

In the post-democratic and post-physical “natural scientific” societies, Will humanity have a “**Non-physical life**”? As has been developed , in the present societies, every individual has three different lives

I. The three different lives of the Personality

A. Sleeping

B. Awake

C. Awake but without the physical body

1. The non-physical sleeping life

In the body’s physical sleeping time,

The Personality, because of “ not being a physical being,” doesn’t sleep and has her or his “ non-physical “ life. She or he can go around without the physical body.

2. The physical awake life

In which the Personality uses the physical body in his or her life.

3. Together life or awake but without the physical body

In this case, for example, the Personality with the physical body is staying in a place and talking with other people, But the Personality can leave her or his physical body and meeting place and go to other places, in other words, despite the fact that he or she “ physically “ is in a meeting place, the “ Personality” of the person can be in other places. About this point, there are people who say that It is “ **mind and thoughts**” which go to other places.

But according to this study,
the mind is a non-physical natural USB and thoughts (thought is not a thinking property) in this USB are without any TAVDA and thereby without any DCD properties, thereby,
mind and thoughts in the mind are not aware of their own existence, hereby
it is the Personality who uses the “ mind and thoughts” in it in her or his activities. Thereby,

In the same way that,
the Personality, both in sleeping and awake time lives without a physical body,
In the same way,
not only, in future societies, even in this time, the Personality can live without a physical body and without a physical universe.

What is lacking is the knowing
how in creation
this **separation and joining** , this togetherness with the
physical body happens ?

The life of the Personality, without any physical body
and “ all the time “ seems to be impossible but
as this skill is developed from three different lives,
even today, the Personality has already two of them,
what is remaining is the third one which is on the way to
being discovered.

In the present time,
there are around 8000 000 000 “ non-physical “
Personalities with their minds,
they have their own “ independent “ non-physical” life,
One of the important changes in the future is
the post democratic, natural scientific home universities,
these are everybody’s engagement in decision making as
a researcher, **this means that,**
with universal problems, there will be at least
8000 000 000 brains of
natural researchers to take part in the decision making.
All these brains together
are a huge intellectual power which can find
for example, how to separate or join the Personality

with the physical body with the Togetherness law or to make human flight without airplanes possible. etc. etc.

The practicability of these views,

1. In the case of separating and joining “ togetherness”

As it has been developed, this happens both in

/ the sleeping time and

/ the togetherness awake time.

2. In the case of human physical flight, If somebody believes in this point that, the earth with its unaccountable weight moves, makes its flight in the sky around itself and around the sun

without any man-made means,

she or he can never claim that

the human with max 150 kg can not fly.

1. The non-physical Personality’s flight, in the non-physical life, the Personality, because of being non-physical even don’t need to flight, he or she has “ is “ in the wished place immediately. For example,

In willing, **for being inside the sun, inside his or her own brain,** her or his presence in the middle of sun or middle of the brain, is immediately. again because the Personality, is not physical..

In the case of the brain,

the **Personality as decider for the activities,** has her and his **togetherness center** in the brain.

6.6 The Five Senses

Different senses or properties have different functions in the body but

1. these physical functioning senses are constructed by their “ non-physical biological software”,
2. These soft wares are only different non-physical thoughts, thereby,

they are not physical,

the seeing sense, hearing sense, talking sense etc.

which lead to seeing, hearing, talking etc.

they are rather. non-physical biological soft wares

which lead to the mentioned functions.

In addition,

Based on this point that

neither the physical part of the senses

nor their non-physical parts

are aware of their existence (except the awareness property), but despite this unawareness, they function, this “unaware functioning” not only is in the case of the senses, even it is in the whole universe, these are signs of the existence of a Non-Physical Intellectual Being

who

has constructed and given function to the universe
namely the MEP of the universe.

The Start of Creation

Now, related to Chapter Six and the “non-physical life,

the whole universe is started by

the **Non Physical** MEP
Who
has constructed the universe, by **non-physical** essence
and
has given function to the universe by **non-physical**
properties. Thereby
In relation to the “non-physical “ life, **even now**,
the human has mainly “ non-physical” life.

1. The **physical body is swimming in non-physical
WVLIMSFTA etc.**
2. The Personality is non-physical and has mainly two
non-physical lives
3. The Properties which give different functions to the
physical body are non-physical.

The only remaining point for
a non-physical life and avoiding a man-made life
with so many intellectual, physical, social, environmental
diseases and problems is

taking the last step by concentrating in two points,

1. What happens, with the Personality (the non-
physical brain and body)
2. In the case of being in a meeting but changing
place etc.

**Why Personalities of existing people
can't do this work ?**

Are the Personalities of awake people different than
sleeping people ? The answer of this study is No, No,
..... then again,

Why can't our Personality take this last step ?
according to this study,

the cause generally is that humanity is not active in this point. Even the activity of a researcher active in this point is not enough. the result becomes, despite the knowledge in different subjects related to this point, because of not having any knowledge about this point, we don't know anything. For example, there are different professors in different subjects, but they don't know anything about Persian or the Swedish language, in relation to other languages, the point that they don't understand those languages does not means that they are other persons. It is the same in the case of the Personality and her or his function.

6.7 The Function of Properties

The Properties are in three different connections,

- A. In connection to one's **own body's** activities
- B. In connection to the **other people** and the thinking brain-having creatures.
- C. In connection to **other natural creatures** without a thinking brain in the universe.

A. Properties Related to one's own body

If some Personalities, for example, will talk about something, the non-physical Personality makes a non-

physical decision to talk, by using non-physical **Affecting Properties** or applications. In the brain, the Personality affects with the non-physical " talking app " of the brain and lastly, by affecting the physical organ of talking, namely the tongue, mouth etc, The Personality talks physically. In this process, **After 5 non-physical steps, or acts** the non-physical Personality makes

a physical act

in relation to her or his own body.

B. In connection to other people and the thinking brain-having creatures.

In this connection with other people.

After the first 5 different non-physical acts, **instead of** affecting one's own brain and body for doing something,

the **Personality**

comes to the " non-physical " Personality and non-physical thinking property of other people and

instead of talking physically by the tongue ,

they talk non-physically

by

the non-physical " talking " thought.

A process which all the time is " non-physical," this non-physicality in activities can be used in all aspects of human life namely

in the **non-physical life**
by
the different properties in their related cases.

**C. In connection to other creatures
without a thinking brain, in the universe.**

In this case, creature
without a thinking brain and thinking property
Every non-physical Personality, can
after first 5 non physical acts or steps ,
intellectually, by the " affecting property" affect the
" non-physical " essence " of the related creature and do
the desired changes,

In Cutting for example, in the case of an apple,
for example, in the case of cutting an apple from a tree,
every non-physical Personality, after entering into the
Essence of the apple, **first**, the human, by using, his or
her own " affecting property"
affects the fruit's biological laws
which keep the apple with the tree and,
after that intellectually changing or cutting
those laws, for example, " keeping the apple with the
tree" to " not keeping them together,"
the apple will fall down on the earth.

In Connecting

Cutting, connecting etc. happen endlessly
in the creation, (among others, in
the human body and the forests)

**without any human help or man-made
means,
therefore**
humanity has the possibility of intellectually doing
the same, cutting and connecting and
thereby having
**a non-physical life in
the Non-physical essence and property of the
universe.**

Related to the gravity,
It has not among others TAVDA properties for
Being able for being any DCDer.
As an attractive force,
All endless, cuttings and connectings
In the human body, the nature
falsifying existence of the gravity
Because
**The earth with its huge attractive gravity force,
Should not permit any move for physical beings.**

6.8 Subjects to study in the home universities,

Among others are

1. The Creation's alphabet and languages
 - A. Inorganic and organic matter's Alphabet

And Language

B. Animals language

C. Birds' Language etc.

2. The MFP and the five senses (Both physical and non-physical studies related to the physical and non-physical lives.)

3. the Affecting Property studies

4. universal Nutrition studies

5. universal Medicine studies

6. universal Natural scientific technology studies, among others, communication technology like

NS Internet and " intellectual " contacts
instead of man-made mobile contacts

Globalising Internet and distance studies

A. There are so many educated people in the universities they have their own home pages, they can make accessible their home pages globally For those who are interested. In this globalization, can help others in building needed internet and other networks.

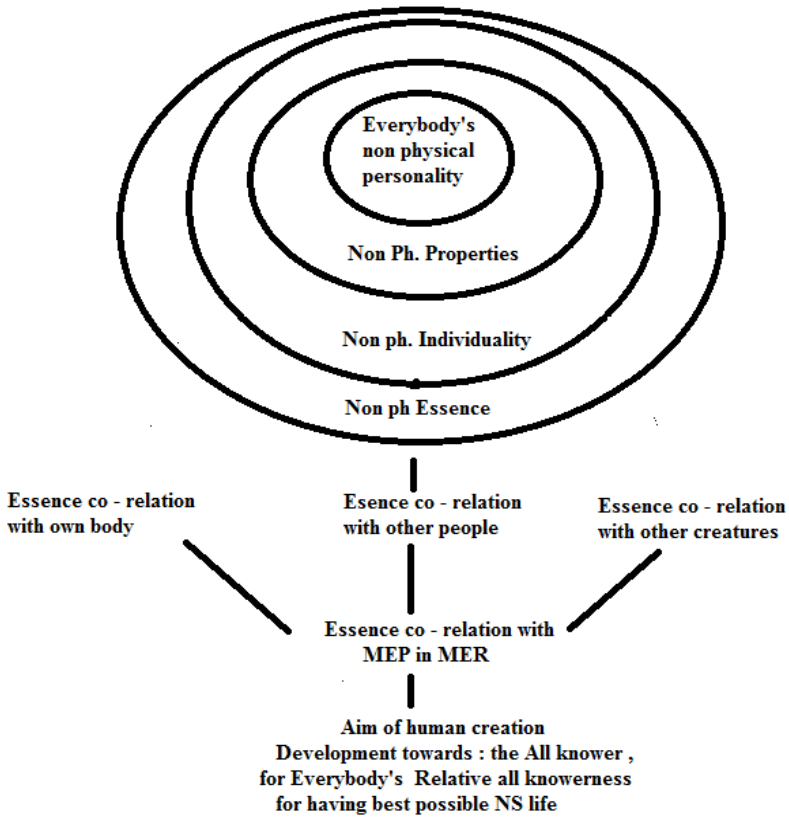

B. At the same time trying for discovering among others

/ natural scientific mind internet.

After discovering needed network, time is for changing the man made to the natural scientific.

.....

6. 9 The Aim of Human Creation

Based on the human body, nutrition articles, the whole universe and the natural scientific beings,

**The more the human being knows them,
The more the human being can have a better and
better life.**

Hereby,
everybody,
should try and follow the NS way of life.
The body's, nutrition articles and the universe's
WVLMSFTA etc.

Instead of man-made WVLMSFTA etc.

By using properties in the natural scientific way,
people will think natural scientifically, will look natural
scientifically, will live natural scientifically etc.

Like a natural scientist researcher in three different areas,

1. in relation to his or her own body,
2. in relation to other people and
3. in relation to other natural beings, for
 - A. developing towards, relative all knowerness and
 - B. using them in the best possible way and
 - C. having the **relative** best possible NS life.

Why relative? because the human being is relative and
can never be absolute.

Picture : NS aims of the human Creation

Summary 6

Non physical life and activities of everybody

Before Every physical act of the brain

if **some non physical Personality**, for example will talk about something,

1. by using non material “ thinking “ property thinks to do something, ex. talking.
2. by Using non material decision making, property makes a decision ex. talking . by
3. Using non material “ affecting property, for
4. affects in non material talking property or application of the brain and
5. Affects in physical organ of talking and there after
6. non physical personality , talks physically .

Thereby, **physical act of talking is
result of 5 non - physical acts.**

In other words,

**Non physical life gives form and function
To the physical life.**

This means that even today,

**Every non physical personality has mainly a
Non physical active life.**

((((((((((((((O))))))))))((((((((((((((O))))))))))

Chapter is about, human life,

/ **without**, her and his physical body and

/ **without** physical universe.

based on

their **non physical, essences** (WVLMSFTA etc.) or
in computer language "soft ware" by which human body
and universe are constructed and **non physical Properties**
or in computer language " applications", by which human
body and universe have different functions.

is about, human life

**1. Not only will be without man made means,
the life will be**

2. Even without, human physical body and

3. Even without physical Universe , based on their
/ **the non-physical, essences** (WVLMSFTA etc.) or in
the computer language "software",

by which the human body and universe are constructed
and

/ **the non-physical Properties** or applications",

by which the human body and universe have different
functions.

the man-made innovations will be replaced by

Natural Scientific **discovered**

**1. physical means for physical life without man made
means in chapter five and**

**2. non physical means for the non physical life
Presented in chapter six.**

for ex, the present existing man-made internet **will be
replaced** by the

@ Mind internet @

Of around 8 000 000 000 people's internet

Universe's natural scientific Internet

Choosing way of research and study

In the same way that,

the whole natural universe has been created,

without any man made

WVLMSFTA etc., and

In the same way that

The universe **functions,**

Without any man made means

In the same way,

the creation WVLMSFTA etc.

can be studied and used by researches,

both in **micro** and **macro** levels

without any man made means.

because again all natural beings

are created without any man made means.

thereby

studies should be based on

Non physical Essence network (WVLMSFTA etc.)
and functions related properties or application networks.

The second @ , in

@ general constructional [network@.](#)

is related to this view that

Every Natural being has many known and un - known dimensions in its, her, his essence construction (WVLMSFTA etc.) and properties TAVDA & DCD dimensions which are different networks. They are together

First @ is for first networks and
Second @ is for co – related networks

General network of every natural scientific being is

among others WVLMSFTA etc. in which

W = will behind creation of related being,

Value = Value behind

L = physical, chemistry biological etc. laws

M = Mathematics used for construction

S = structure of the related being

F = function of

T = technology, like atom, cell, plant etc. technologies

A = creational aim of related being etc.

Thereby

basing the study only on, for example mathematics,
is nothing less than going astray in the study both
in micro and macro levels of the universe.

How ?

For ex. in the co – relations networks

In micro level between not discovered pre quarks etc

. beings and quarks and their affects in
function of quarks,

In macro level

between

Human - human WVLMSFTA etc.

Networks co – relations and
together functions for natural scientific
aimed togetherness (not man made togetherness like the
case of dobble – hit) etc.

It is the same in co – relation between

Human – animal
Human – plants etc.

Again related to the Innovation and Discovery

In the same way that,

Not discovered pre quark beings,
atom, cell, human being, universe
are created and function,

In the same way,

Every human being,
Without any other human help or
Man made means and make
physical and non physical studies and activities
for example, make any kind of surgery
even in own body for ex. in own brain.

Again

In the same way that

The brain is created without any human
help or man made means,

In the same way,

Brain can be treated
Without any other human help
By every individual herself or himself
As it has been developed in chapter 3 , by
“ affecting property of everybody..

The first points for reaching such a society
/ is starting home universities
/ developing different natural scientific
intellectual and physical networks

Practicability

Of these views is again
Existing, functioning but unaware universe
about its own existence

Falsifying

Rejecter of “ natural scientific societies,
Home universities etc. should prove that
Without human help and manmade means,
The universe could not exists and function.

Not only this falsification is absolutely impossible

It becomes an paradox which proves
Existence of the universe which is
Created and function without any human
being or any man made means.

Thereby

**The only right way of study and living is
natural scientific Discovery way.**

Three evaluation basis of views

1. Unimabinability

Establishing natural scientific societies and
living a natural scientific life

Without

Any human innovated intellectual or
physical means,

Seems to be unimaginable but

2. Undeniability

It is undeniable, that

Man made innovations are not
Natural scientific means and

As it has been mentioned,

In the same way that,

Not discovered beings, particles, atom,
cell ,human brain,

earth, sun and the whole universe,
are created and function
without any human help or man made
means or innovations,

In the same way,

humanity can

Discover Natural scientific means

and solve all his and her

Intellectual, physical, social, technological
environmental etc. problems,

Without any need for man made means or
innovations.

3.. the only way

The only right way is,

Natural scientific **discovery** way.

.....
